

Elevate Labs Task 7

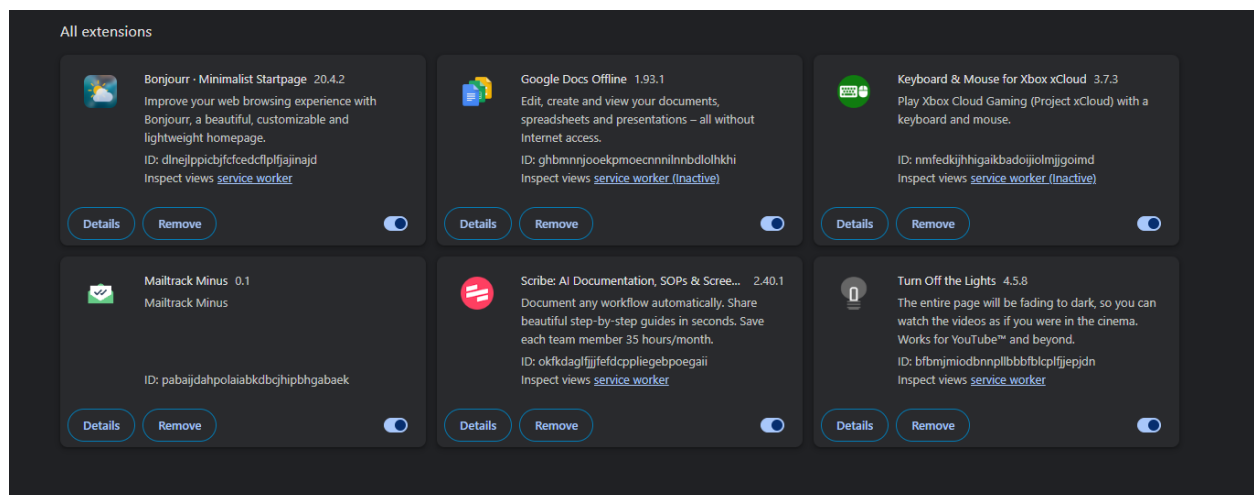

1) Checking permission for each extension

- Go to manage extension setting
- Select the extension for inspection
- Click on details button
- Goto Site Setting, Site Access

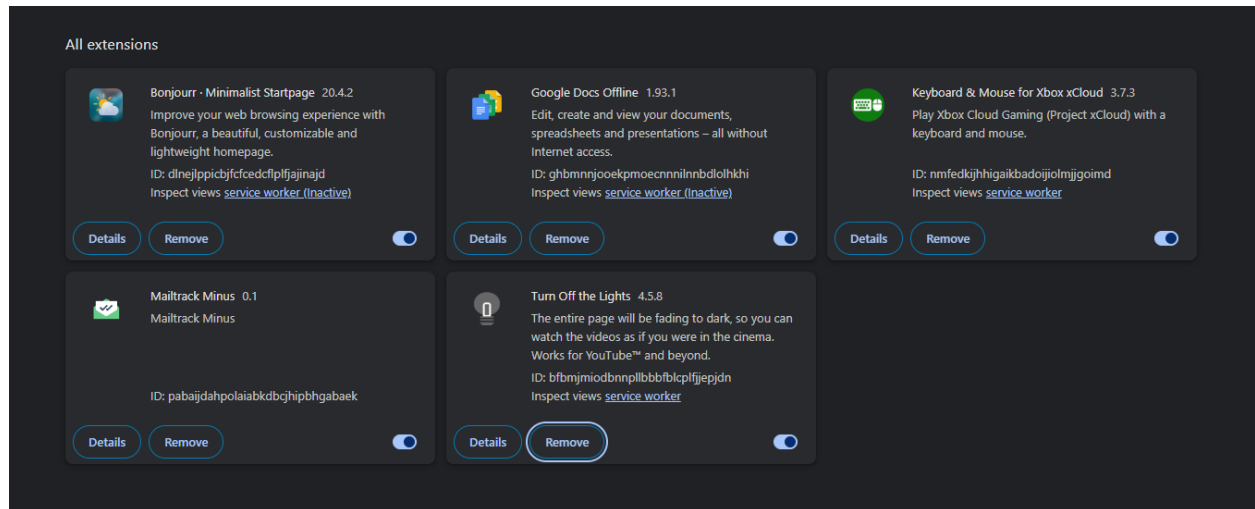

The extensions must not have all the permission in your browser if the extension show permission to ALL Sites must disable it or Remove the extension from the browser

2) Identifying unused or suspicious extensions

- I have total 6 extension in my browser

While inspecting this I found out that there is an single extension which I don't use any more so I have deleted that from my current browser extension package

3)Improvement noticed

- After removing the extension my browser becomes a little smooth and responsive as due to less RAM usage

4)How Malicious Extension harm user

- Steal your data or passwords
- Track your browsing
- Show pop-up ads or redirect you to scam sites

5) Document Steps Taken

Cleaned Chrome Extensions - [3/7/2025]

Removed: Scribe

Reason: Unused

Performance: Improved page loading
